Continuation of Attachment(s) 3. Information Disclosure Statements (PTO/SB/08), Paper No./Mail Date:

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Paul Conover on 4/20/2010.

The application has been amended as follows:

Please insert the following as the first paragraph of the specification: "This application is a national stage application filed under 35 U.S.C. 371 based on International Application No. PCT/US04/42723 filed Dec. 21, 2004 which claims benefit of U.S. Provisional Application No. 60/532,916 filed Dec. 30, 2003."

In lines 37 and 47 of claim 1, please change the phrase "first proximal portion" to "proximal first portion".

Please cancel claim 6.

In claims 37-43, please add the term "medical" between the terms "luer" and "connector" so that the preamble reads "The valved male luer medical connector of claim 1...".

In line 3 of claim 43, please replace the term "external" with the term "exterior".

2. The following is an examiner's statement of reasons for allowance: The subject matter of the independent claim could either not be found or was not suggested in the prior art of record. Specifically, the combination of features is the basis for patentability. The subject matter not found was a connector comprising a male luer projection, a female luer end portion, an exterior housing positioned therebetween, a valve member having a first portion that is within the external housing and not within the male luer projection in the closed position and having a second portion within the male luer projection, a longitudinal pathway and a transverse pathway within the second portion of the valve, a closed-ended plug, a seal extending around the second portion of the valve, a biasing member that surrounds a portion of the first portion and is non-unitary and discrete from the seal and the valve member, and an actuating member that is actuated by a female luer end and is (along with the first and second portions of the valve member) non-deformable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
